IMPORTANT

Read Carefully

All statements on this page apply only to this book.
All orders based on this book subject to our acceptance.

About Delivery

You want on-time delivery—and we want you to have it.
You can have on-time delivery if you place on-time orders.

On-time orders are orders placed as soon as contracts are let and before work is begun. Efficient and economical construction requires that the builder know exactly the size and design of the material before work is begun.

Stock List

All articles marked with a star (★) in this book are regular Chicago Warehouse stock. All other items, unless distinctly marked as "made to order," are usually in stock at some other Curtis plant, but in ordering, sufficient time must be allowed for delivery.

Rush orders not in stock at the plant where they are placed are usually shipped direct at the buyer's expense, but on-time orders are all assembled at one point and shipped subject to all our regular terms.

Order Now

If all of those interested in our product, whether retailer, contractor, architect, or homebuilder, will place their orders promptly, we, as producers, can operate in that efficient, orderly way that brings higher quality, lower costs, and better service. Don't delay—order now.

Freight Allowance

All shipments of a total weight of 300 pounds or more are subject to full freight allowance, based on present rates, provided the freight bill is returned to us within 30 days from date of shipment.

Returned Goods

Do not return anything without our shipping instructions. If returned at our order and received in good condition, stock goods as described in this book will be credited at the invoice price less 20% after deducting all transportation charges. Special sizes can not be returned nor will credit be allowed on stock that is returned without our written shipping instructions.

Terms

Net Cash except to dealers with whom we have established credit and discount arrangement.

CURTIS WOODWORK

Many years ago the habit developed of calling doors, windows and finish woodwork "millwork" simply because all those things had to be made to order in a mill. The term "millwork" always has been confusing. To the housewife such things have always been "woodwork." And so it is a natural and proper development that the new and better designed line of woodwork by Curtis has become simply Curtis Woodwork.

What It Is

Curtis Woodwork is a carefully selected line of doors, windows, frames, moldings, cabinet work and stair parts which are made in certain definite designs, sizes and woods. It is the line described in this book. It cannot be changed in any way without increasing the cost, delaying the delivery and possibly destroying its beauty. When changed, it becomes special millwork and all the advantages of the standard line are lost.

The range of choice in each commodity is so great that there is something suitable for any home regardless of its cost. For the modest home it offers an "air of class" at no increase in cost; for the better home it permits a lower cost with no loss of beauty or service. When used for the purpose for which it is intended, every article is guaranteed to satisfy the user.

What It Is Not

Curtis Woodwork is not just millwork that might be made in Curtis factories, for articles that must be made to specifications not our own must be classed as strictly special work, and special work is always made at the buyer's risk.

Our guarantee cannot be expected to apply in the same way to special millwork as it does to our standard line. The designs in this book combine our practical experience of over half a century with the technical knowledge of those who make a study of good design. These we guarantee.

As a matter of accommodation and service to those customers who use our standard line, we can supply such articles as can be assembled from standard parts or K. D. material, but naturally when we are devoting our efforts to the giving of service on a definite, distinctive line as large as Curtis Woodwork, it is not possible for us to give as good service on large quantities of special material as those who cater to that type of business.

Our Guarantee

*The Makers of Curtis Woodwork Guarantee
Complete Satisfaction to Its Users*

"We're Not Satisfied Unless You Are"

This guarantee means that if upon delivery, any article of our standard line does not satisfy the buyer, we will replace it with an article that does satisfy him or accept cancellation of the order.

It means that if any article of our standard line has been used because it appeared satisfactory upon receipt, but within the first year of use, developed flaws in materials or workmanship, not due to improper handling or local conditions, we will replace it with an article that does not contain such flaws.

Woodwork, when first installed in a building, is more subject to radical changes in temperature than it will be after it has been in place for a few months. Any defects due to faulty construction or material should develop during that period. Therefore, we believe that any defects which may develop in an article of our manufacture after it has been in service for one year—that is a season of heat and one of cold, a season of wet and one of dry—are defects which are due to causes beyond our control and for which we should not be held responsible.

Our product is finish material and should be handled carefully. Excessive moisture or extreme dryness—either one can ruin it. The most common error is to place the unprotected material in a damp warehouse or in a freshly plastered building. Another is to paint and varnish only those surfaces plainly visible, leaving entirely unprotected the top and bottom edges of doors and windows. Last, but not least, there is the tendency to dry out the interior of the home with such extreme dry heat that everything inside is virtually "baked." This last is most important because the danger to health is as great as is the bad effect on materials.

Please Note

We do not Guarantee that everything made by Curtis is perfect. We cannot guarantee that, nor can anyone else. Our Guarantee does mean that in articles intended to maintain a pleasing appearance and to give satisfactory service over a long period of time—quality of material and care in preparation are given first consideration.

It does not mean that we will assume any expense or pay any bill that the buyer may present for labor or material that he may have used in correcting some fault that he believes is ours. If our product is unsatisfactory or it appears that we have made an error, we should be notified at once. Then we can correct the error in our own way, which is proper if we are to stand the cost. Under no other conditions will we be responsible for rejected material or mistakes.

How Do You Want the Lights Arranged?

The light or lights in Curtis **Flush Doors** can be arranged in various ways. Some prefer one light only, in the center of width and near the top of the door—a truly conventional design. Leaded glass can be used effectively for this one-light door. Others prefer two or more small lights, arranged this way or that. In ordering flush sash doors, indicate the arrangement of light or lights, or submit sketch showing just what you want.

For cutting light—Square, Diamond, or similar..... Each \$ 2.60
 —Full Circle..... " 10.00
 —Segment or Half Circle Top..... " 7.60

Arrangement A.

Arrangement B.

Arrangement C.

"Plank" Doors

Curtis **Flush Doors** can be grooved to simulate the old-time "plank" doors. They represent sturdiness, strength. The grooves are cut to make the "planks." Almost any number of "planks" are used, the width of the door affecting the width of the planks.

Price for grooving—Per groove, on one side of door only..... Each \$0.50

(If door is grooved on both sides, this charge "per groove" applies for each groove cut on each side. Eg.—Extra for 5-Plank-Square-Top Door, grooved two sides \$4.00)

4-Plank
Circle
Top

5-Plank, Square
Top

6-Plank, Square
Top, 1 Lt. Gl.
Leaded D. S.

These suggestions for variations in design cover only the sizes of doors given on Page 15 for Door No. C.1080, in three kinds of wood.

Garage Doors

Furnished in Vertical Grained Gray Fir or Spruce (our option)—Glazed Plain

C-1450

8-0x7-6 1 $\frac{3}{4}$	Opening, Per Pair.....	\$20.48
8-0x8-0	" " " "	21.98

C-1451

8-0x7-6 1 $\frac{3}{4}$	Opening, Per Set.....	22.20
8-0x8-0	" " " "	23.18

The doors are made of either Vertical Grained Gray Fir or Spruce, practically clear material being used. From the standpoint of durability and appearance they are far superior to the low grade pine doors offered on the market. The workmanship conforms to the Curtis standard. These doors will represent quick turnover stock for you.

Crated one pair or one set to a bundle—at no extra charge.

These C-1450 and C-1451 garage doors are in stock at the Wausau Factory only. Allow time for shipment from that point.

No hardware is included in above prices.

Order now to make sure of delivery when needed. See page one.

Combination Storm and Screen Doors

The combination door is a great saver of time and annoyance for when it is once in place it remains there the year around. In the Spring the glazed storm panel is quickly replaced by the screened panel which converts the storm door into a screen door. In the Fall the glazed panel is again inserted and the storm door is ready for use.

All Curtis Combination Doors are equipped with the hardware here illustrated which is made of solid brass and bears our trade-mark. This makes it a simple matter to exchange the panels quickly.

All that is needed is a screw driver.

C-1460

Carried in White Pine in the White with 14 mesh galvanized wire screen and glazed sash panel fitted with fasteners.

Sizes	Glazed
* 2- 6 1/2 x 6-9 1 1/8	\$10.02
* 2- 8 1/2 x 6-9 "	10.25
* 2- 8 1/2 x 7-1 "	10.68
* 2-10 1/2 x 6-9 "	10.44
* 2-10 1/2 x 7-1 "	10.78
* 3- 0 1/2 x 6-9 "	10.85
* 3- 0 1/2 x 7-1 "	11.11

Weight 3-0 1/2 x 7-1 1/2, 52 lbs.

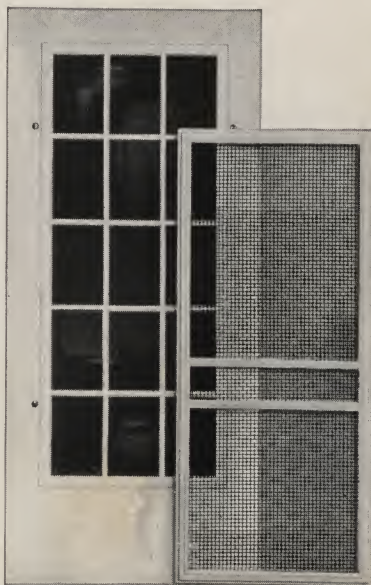

For irregular or intermediate sizes use list of next larger listed size and add 33 1/3%.

Screen panels wired with Pearl wire, add \$0.60; with Copper Bronze wire, add \$1.40.

Circle Top or Gothic Top

	Circle Top	Gothic Top
3-0 1/2 x 6-9 1 1/8 and smaller	\$36.05	\$28.07
3-0 1/2 x 7-1 1 1/8	36.87	28.90

These doors are similar in layout to C-1460,—the door, the sash and the screen inserts, being circle top (or gothic top) inside and outside.

No Charge for Crating Six Doors of same size.
Crating Charge \$1.25 net for less than Six Doors.
Two Bundles required. Screen Panel bundled separately.

Genuine "Andersen" Window Frames

Frame No. 101

This is for regular frame wall construction. It has Outside Casing $1\frac{1}{8} \times 4\frac{1}{2}$, Jambs $5\frac{9}{32}$ wide including blind stop. No inside stops. Pockets screwed in and cast iron pulleys in place. Fitted ready to set up with water drip, blind stop and check stop nailed on.

For prices see page 39.

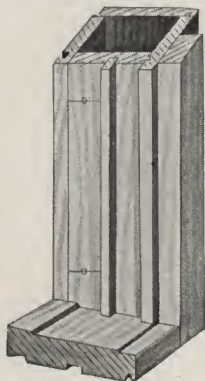

Frame No. 101

Frame No. 171

This is the box frame for solid brick wall as shown on the right. The boxes are nailed together, pockets cut and pulleys in place. The head jamb is $1\frac{3}{8}$ thick, the pulley box $4 \times 5\frac{9}{32}$ overall, and the sill $1\frac{3}{4} \times 6\frac{1}{2}$.

For prices see page 39.

Stucco Frames

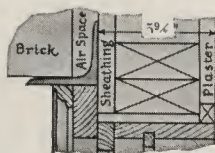

Frames for stucco wall are made by adding a stucco mold and a wide drip cap to Frame No. 101. For price, add **\$0.60** per opening.

Brick Veneer Frames

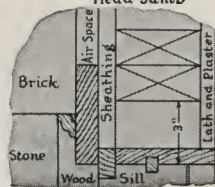

Frame No. 101-B

One simple mold added to the regular stud-wall frame, No. 101, makes it suitable for brick veneer work at an extra cost of only **\$0.30** per opening. It is not only economical, but it permits the use of regular stops and stools, which makes an important saving on the interior trim.

For made-to-order frames with wide jambs and wide blind stops, add **\$2.00** to the price of frame No. 101 of same size.

36 x 36.....	★ 1.88	★ 3.46	★ 4.06	★ 3.46

Other sizes are made by interchanging bundles. To get a 30 x 16, take the head and sill bundle of the 30 x 30 and the side bundle of a 16 x 16. The price can be obtained in the same way, but to make it easy for you, on page 39 is listed the complete frame price of all sizes in general use. However, all the sizes that can be made are not listed for these thirteen sizes will make 169 different sizes without the use of a saw, and they will all fit perfectly.

These parts are regular stock. Frames which require other size parts are like odd windows and doors—they take a much higher price.

Windows

C-2502 Two-Light Check Rail 1 $\frac{3}{8}$

When ordering sash or windows always give width first, height second, then thickness.

Always use inches to designate glass size, and feet and inches for opening or outside measurements.

The term "Window" indicates two pieces (upper and lower sash) and "Sash" indicates one piece to fill opening.

"A" Labeled glass is used in all windows priced on this page.

Extras for Special Work—

Intermediate Sizes: Ten or more of a size and kind—use price of next larger size.

Less than 10 of a size and kind—add $33\frac{1}{3}\%$ to price of next larger size.

O. G. Lugs on top sash of $1\frac{3}{8}$ " windows—add \$0.28 per window.

$1\frac{3}{4}$ " Windows: Ten or more of a size and kind—add 50% of the Open Window, to the price of corresponding $1\frac{3}{8}$ " window.

Less than 10 of a size and kind—add 100% of the Open Window to the price of corresponding $1\frac{3}{8}$ " window.

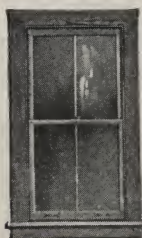

Curtis Quality

1. "A" Labeled glass is used in all windows priced on this page.
2. Windows will be "oil primed" or "white primed" at no extra charge, if so ordered.
3. Curtis rabbeted check-rail keeps out the weather.
4. All glass is properly wedged and back-puttied.
5. The Curtis putty groove clinches the putty strip.
6. Curtis putty is of special high quality.
7. Kiln-dried California White Pine insures satisfaction, if windows are properly fitted and promptly painted on all sides and edges—especially the bottom edge.

See Inside Front Cover—for charges on less than full bundles

C-3041

OVOLO MOLDED—RAISED PANELS

This door is of Italian inspiration, with enough adornment to make the design adaptable to the modern interior. The stiles have a $4\frac{1}{4}$ " face measurement.

This style is not carried in stock. Sufficient time for manufacture must be allowed when placing orders. Unselected Birch (veneered) is most appropriate for this door because of the types of finish called for by architects and builders. The prices will depend on the quantities and sizes.

With Door C-3041 is shown

Trim C-5150, priced on page 97.

For Open Mirror Door C-3170, add \$1.76 to price of any W. P. panel door or \$2.09 to any Hardwood door priced on Page 75.

Order now to make sure of delivery when need. See page one.

Interior Doors

Door—C-3170

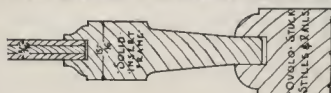

The "Modern" door, showing the panel-within-a-panel effect, but without "planted on" moldings, either on panel face or to hold the panel in place. The insert frame is molded and all nailing is eliminated.

Face measurement of stiles and top rail, $4\frac{1}{4}"$; of bottom rail $9\frac{1}{2}"$; of frame, $2\frac{11}{16}"$. Greatest thickness of insert frame is $\frac{15}{16}"$; the thinnest part is $\frac{1}{16}"$. The veneered panel, 3 ply laminated, is $\frac{5}{16}"$ thick.

The panel and the insert frame are produced from the same wood.

Dependable Curtis construction and materials qualify this door to bear the Curtis Trademark.

Interior Doors

Door C-3212

Since the radius of the circle top and consequently the spring line in these doors vary with the width of the opening, in order to maintain the proper proportion in the lights it is necessary, for the 5' 0" opening, to have one light less in height. If you should use two different widths in the same room, the light arrangement will differ in height. If this is objectionable the openings should be specified of uniform width.

The stiles in these doors are $3\frac{3}{8}$ " face and the bars have rule-joint sticking.

Glass Size of Rectangular Lights

Interior Slab Doors

Door C-3531

The new V-joint slab door is especially suited to early English and Spanish types of houses. Its construction is similar to C-3530 except that the face veneers are $\frac{1}{4}$ " thick. Into the veneer the grooves are cut, varying in number with the width of the door to make the "planks" approximately 6" in width.

Sizes		White Pine	Plain Oak	Unsel. Birch
2-0x6-8	1 $\frac{3}{4}$	\$21.04	\$24.06	\$21.66

		Approx. Weight	
2-8x6-8	1 $\frac{3}{4}$	W. P.	81 lbs.
2-8x6-8	1 $\frac{3}{4}$	Oak	85 lbs.

Door C-3532

Similar in construction to C-3531. The edges of the half circle top are covered with a strip to show the same wood as the face of the door.

WHITE PINE

Sizes		
2-0x6-8	1 $\frac{3}{4}$	\$25.50
2-6x6-8	"	29.10
2-8x6-8	"	30.85
3-0x6-8	"	30.55
3-0x7-0	"	31.10

PLAIN OAK

2-0x6-8	1 $\frac{3}{4}$	\$29.80
2-6x6-8	"	33.40
2-8x6-8	"	35.35
3-0x6-8	"	35.20
3-0x7-0	"	35.85

Note: The "blanks" for doors C-3531 and C-3532 are carried in stock in the sizes indicated above; but, sufficient time must be allowed for cutting in the grooves to form the "planks". This time allowance must be considered when placing orders.

No hardware included in above prices.

Warning!

Every retail lumber dealer should carefully note the following facts, for the benefit of his customers and the welfare of his business.

Many people do not realize the importance of providing the proper amount of moisture in the air within their homes. Without proper moisture, the air becomes so dry as to endanger health, to make heating of the home very difficult, to damage furniture, to crack walls, ruin floors, warp doors and spoil interior woodwork.

The effect of the lack of moisture on health is considered so important that the city of Chicago, through the Department of Public Health, has issued a printed bulletin on this subject,—provision for proper amount of moisture in the air, after heating apparatus is in working order for the winter months.

It is considered a waste of fuel to force the temperature of the home above seventy degrees,—if a little water in the air will promote comfort for the family.

In homes where the heat is intense and the moisture slight, the effect is practically to bake the interior of the house. No wood product can stand such conditions. Even the movable furniture, which is usually thoroughly finished, responds to the lack of moisture in the air—and frequently is ruined. Certainly rough lumber and interior woodwork, usually only partly protected, cannot withstand the ravishes of "too dry heat."

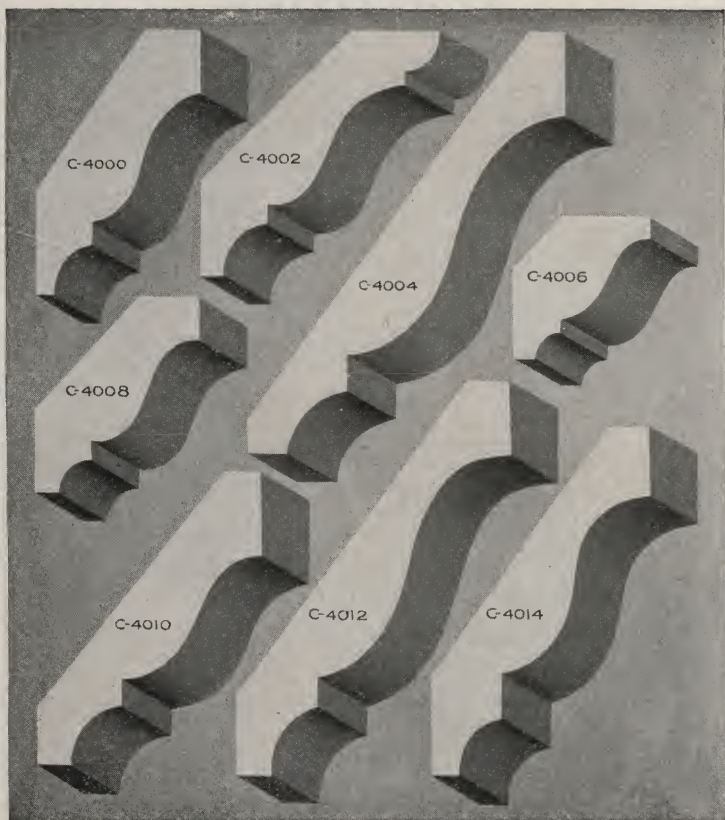

The correct idea is to maintain as nearly as possible, the same atmospheric conditions within the house as usually exist during the summer months, when artificial heat is not necessary. These are best not only from the standpoint of health and comfort, but such conditions are conducive to the long life of all wood materials in the house.

Dampness on one and dryness on the other side of a piece of wood will cause it to curl. This accounts for the warping-in at the top or bottom of so many exterior doors. These doors should be **THOROUGHLY PAINTED ON THE TOP AND BOTTOM EDGES**, and properly finished on both sides and edges (of the stiles). Painting will not entirely eliminate the trouble of "warping-in" if the heat on the inside is too dry or too direct, but it will help. In the same way, interior doors will dry out in the joints if subjected to strong, dry heat. Further, if one room is kept dry and hot, and the next room to it is not as dry and as hot, doors between will be inclined to warp toward the drier, hotter room. Doors of good manufacture can give proper service if they are properly finished (both sides and all four edges) and if the proper amount of moisture is provided within the house.

The "baking process" often affects the jambs and studs even more than it affects the doors, so that frequently shrinkage in them causes the doors to work badly.

No manufacturer can guarantee wood products to give satisfaction if no provision is made for the proper amount of moisture in the air inside of buildings.

Curtis Narrow Interior Trim

On pages 110 and 112 are illustrated twenty-one narrow casings, with appropriate bases, all made from Curtis moldings. The details below compare the application of this narrow trim with the application of wider trim.

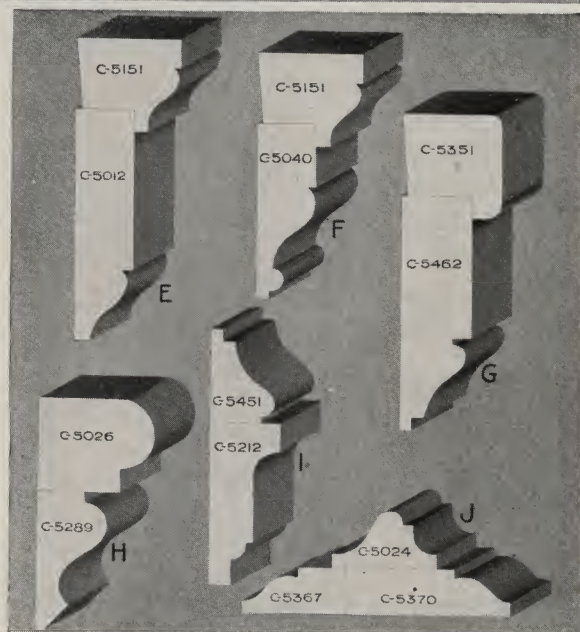

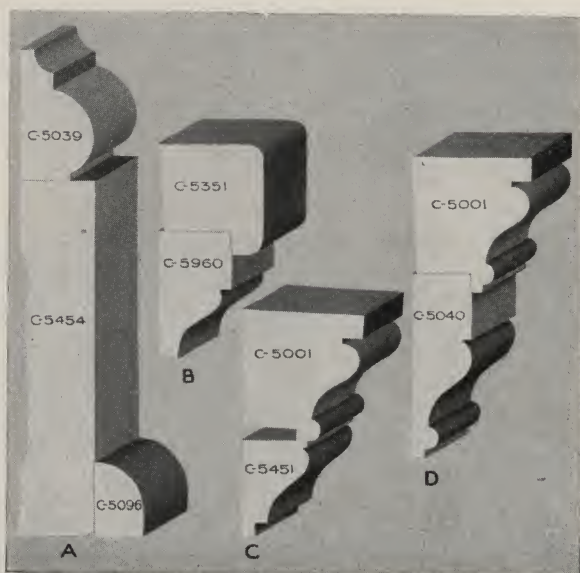

“A” is a space to be covered by trim of the usual width, and “A'” is the ground strip explained by the details beneath it. The ground strip (or lath) provides a key for the plaster and suitable nailing surface for Curtis Narrow Trim.

Curtis Narrow Trims “A” to “X” inclusive are illustrated on pages 110 and 112; priced on pages 111 and 113, as sides of trim. The moldings are priced in lineal feet on pages 90 and 91.

Order now to make sure of delivery when needed. See page one

Narrow Interior Trim

For prices of complete sides of trim, see page 111.

Narrow Interior Trim

On page 110 are shown several designs of narrow interior trim made up of a combination of small moldings. Prices per 100 lineal feet will be found on pages 90 and 91 where these moldings are listed in numerical order. Below are prices per side of trim for the combinations illustrated.

Extras

The above prices apply on moldings in random lengths (6 feet long and over). When ordered in specified lengths except 16 feet, add 5%. When orders specify all 16-foot lengths, add, Pine 10%, Hardwood 30%.

If ordered in quantities of less than 500 feet, add \$1.73 set-up charge. For quantities of 3,000 feet or more of one design and wood, deduct 20%.

For moldings cut to length, figure even feet and add 10%.

For drum sanding flat surfaces, all moldings not wider than 3 inches, add 37c per 100 feet. Over 3 inches wide, 52c.

3/4-inch head casing, side casing, apron, base, and jamb stock are figured on the 3/4-inch casing and base list.

Rabbeted moldings—such as backbands—add to list, White Pine \$0.52, Yellow Pine \$0.50, Plain Oak \$0.80, Unselected Birch \$0.85.

Schedule of Lengths for Sides of Trim

Side Casings—Not to Miter

For each "Side of Trim," whether single, double or triple for:
 Two light windows—glass up to 14" high, specify 2 Pcs. 3-0 (1 Pc. 6-0).
 " " " " 16" to 20" " " 2 " 4-0 (1 " 8-0).
 " " " " 22" to 26" " " 2 " 5-0 long.
 " " " " 28" to 32" " " 2 " 6-0
 Doors or cased openings up to 6-10 " " 2 " 7-0
 7-0 to 7-10 " " 2 " 8-0
 For multiple frames add one mullion casing for each extra opening.
 Casement sash casings must be one inch longer than the sash.
 For side casings to miter, specify lengths same as side back band.

Side Back Bands

For each "Side of Trim," whether single, double, or triple, for:
 Two light windows—glass up to 18" high, specify 2 Pcs. 4-0 (1 Pc. 8-0).
 " " " " 20" to 24" " " 2 " 5-0 long.
 " " " " 26" to 30" " " 2 " 6-0
 Doors or cased openings up to 6-6 " " 2 " 7-0
 6-8 to 7-6 " " 2 " 8-0
 Side back bands for casement sash must be six inches longer than sash.

Head Back Bands

For each "Side of Trim" for:
 Doors or cased openings up to 2-0 wide, specify 1 piece 3-0 long
 " " " " 2-2 to 2-6 " " 1 " 3-6
 " " " " 2-8 to 3-0 " " 1 " 4-0
 " " " " 3-2 to 4-0 " " 1 " 5-0
 " " " " 4-2 to 5-0 " " 1 " 6-0
 Head back bands for windows or sash are same length as stools.

Door Head Casings

For each "Side of Trim" for:
 Doors or cased openings up to 2-2 wide, specify 1 piece 3-0 long.
 " " " " 2-4 to 2-8 " " 1 " 3-6
 " " " " 2-10 to 3-2 " " 1 " 4-0
 " " " " 3-4 to 4-2 " " 1 " 5-0
 " " " " 4-4 to 5-2 " " 1 " 6-0
 For sidelight entrances, use total width of door, sidelights and mullions.

Window Head Casings

For each "Side of Trim," for:
 Single wds. or sash with glass up to 16" wide, specify 1 pc. 2-6 long.
 " " " " 18" to 22" " " 1 " 3-0
 " " " " 24" to 28" " " 1 " 3-6
 " " " " 30" to 34" " " 1 " 4-0
 Double wds. or sash with glass up to 18" " " 1 " 5-0
 " " " " 20" to 24" " " 1 " 6-0
 " " " " 26" to 30" " " 1 " 7-0
 Triple openings of gls. average up to 16" " " 1 " 7-0
 " " " " 18" to 20" " " 1 " 8-0
 By "glass average" is meant that 8-0 is long enough for three windows that average 20" wide, like a 28" center and 16" sides.
Note:—For Aprons specify the same lengths as for head casings.

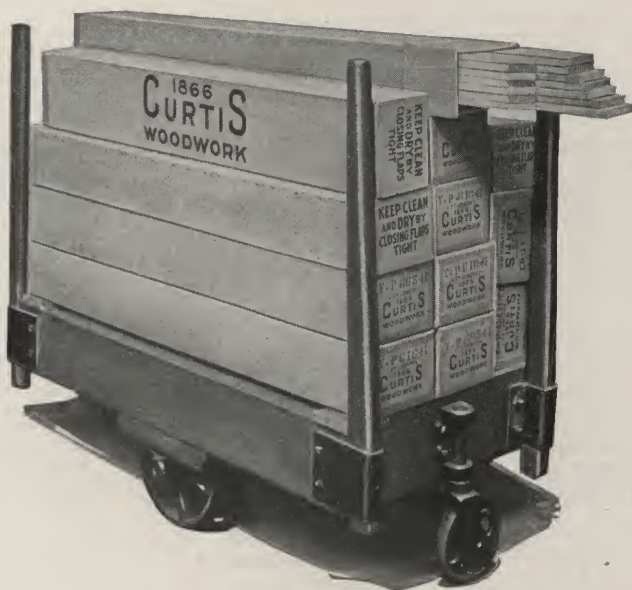

Stools for Windows

For each "Side of Trim" for:
 Single wds. or sash with glass up to 20" wide, specify 1 pc. 3-0 long.
 " " " " 22" to 26" " " 1 " 3-6
 " " " " 28" to 32" " " 1 " 4-0
 " " " " 34" to 44" " " 1 " 5-0
 Double wds. or sash with glass up to 16" " " 1 " 5-0
 " " " " 18" to 22" " " 1 " 6-0
 " " " " 24" to 28" " " 1 " 7-0
 Triple openings of gls. average up to 16" " " 1 " 7-0
 " " " " 18" to 20" " " 1 " 8-0

Window Stops

For every opening in each frame, for:
 Each window with glass up to 18" wide, specify one head stop 2-0 long
 " " " " 20" to 24" " " " " 2-6
 " " " " 26" to 30" " " " " 3-0
 " " " " 32" to 36" " " " " 3-6
 Also for every window, specify two side stops same length as side casing.
 The above rule also applies to single sash that need stops.

Curtis Trim in Cartons

A Truckload of Curtis Cartoned Trim.

Curtis trim packed in substantial fibre board cartons as pictured above gives you clean, dry, sanded stock in lengths that can be used with very little waste. (See opposite page.)

You now have available designs of trim as indicated on the following pages packed in cartons of uniform size, each one trademarked and showing the design, number of pieces and lengths in each carton. The dealer who carries this carton trim in stock is able to furnish one or several pieces from a carton and still retain stock under dustproof cover and in orderly fashion. He saves money by reducing his investment and at the same time is able to give better service. With a little experience, he can determine the proper balance of lengths and carry only an average quick turnover stock.

Show your customers a stock of this trim and see how they react. Any customer who compares this clean, bright, cut-to-length stock with the ordinary unsanded long length trim that is usually offered will quickly realize that you are giving him his money's worth.

On pages 118 and 119, the trim now available in cartons is priced by the carton.

Bookcase Material

C-6000 Bookcase Material (to be assembled). Both vertical and cross members are supplied in long lengths so that they may be adapted to any ordinary requirements in size. The end pieces are $1\frac{1}{8}'' \times 9\frac{1}{2}''$ bored on one side for shelf rests; top $\frac{3}{4}'' \times 10''$ exclusive of moldings. Vertical divisions are recommended where the width of the case is over $4'0''$. These divisions are similar to the ends except that they are $8\frac{3}{4}''$ wide and bored on both sides for shelf rests. Backs are three-ply $\frac{5}{16}''$ White Pine panel stock and put together in sections with the $\frac{3}{4}'' \times 1\frac{3}{4}''$ plowed division strips. Filler strips $\frac{3}{4}'' \times 5\frac{1}{2}'' \times 4'6''$ to extend to floor on either side of mantel are furnished to take up variable widths of chimney breast. Moldings for top are furnished to match and member with mantels C-6055, C-6065 and C-6070. Sections of these book shelves may be ordered assembled if desired in which case, all necessary measurements, the design of base and design of mantel to be matched must be specified.

C-6001 Bookcase Material (to be assembled). This design should be specified where ceiling height sections are desired. The material is similar to that in C-6000 except that the top is made of White Pine, with hardwood moldings, since it is unexposed.

	Plain Oak	Unsel. Birch
C-6000 top including all molds, per lineal foot.....	\$ 0.82	\$ 0.82
C-6001 top including all molds, per lineal foot.....	.74	.74
Intermediate shelf $8''$ wide, per lineal foot.....	.40	.40

Ends, per lineal foot.....	1.05	1.05
Vertical divisions, per lineal foot....	1.13	1.13
C-6000 Filler strips, each.....	.92	.92

Miscellaneous Material

$\frac{5}{16}''$ 3-ply laminated White Pine panel, per square foot.....	\$ 0.29	
$\frac{3}{4}'' \times 1\frac{3}{4}''$ White Pine division strip, plowed 2 edges, per Hd. lineal foot.....	3.75	
Metal shelf rests, per dozen.....	.23	
Three member base, C-5451, C-5042, C-5046, per Hd. lineal foot.....	23.10	23.53

In pricing lineal material, we break on $6''$ in length.

On each order for bookcase material, sufficient insert filler for the ends and vertical divisions and $\frac{3}{4}'' \times \frac{3}{4}''$ White Pine, bottom shelf cleats are furnished. These bookcases may be used without panel backs if desired. We recommend buying the lineal stock in $4'6''$ and $9'2''$ lengths.

Base similar to that used in the remainder of the room may be ordered, if desired, to finish the base of these cases.

Bookcases Assembled at the Factory

Bookcases will be assembled at the factory at the following additional charges:

C-6000 type, each.....	\$ 9.26
C-6001 type, each.....	13.88

Order now to make sure of delivery when needed. See page one.

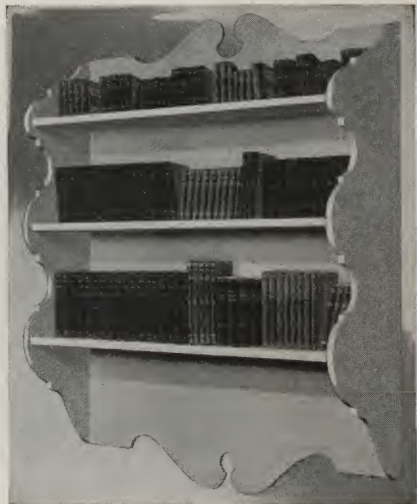

Hanging Book Shelves

The hanging book shelves illustrated on this page are quaint and attractive accessories for a modern home. They are suitable for any type of house and for any room and are equally useful for books, collections, art objects or china. They may be used in pairs or in narrow wall spaces and will lend themselves admirably to decorative treatment.

C-6020 Overall dimensions, height 2' 6", width 1' 6", depth 7 1/4". Distance between shelves 7 3/8" and 8 1/4". Depth of shelves 6 3/4". Made from 1/2" material, no back included and shipped K. D.
White Pine..... \$3.40
 Approximate weight 20 lbs.

Note the artistic finish of these little cabinets, the perfect joints and pleasing contour of ends, top and bottom pieces. Each cabinet has three stationary shelves set at graduated distances. They are shipped K. D., carefully packed and ready for quick, easy assembly.

C-6025 Overall dimensions, height 2' 9 3/4", width 2' 6", depth 7 1/4". Distance between shelves 7 3/8" and 8 1/4". Depth of shelves 6 3/4". Furnished K. D. with three-ply 5/16" panel back. All other parts are of 1/2" material.
Unselected Birch.....\$8.10
 Approximate weight, 30 lbs.

Order now to make sure of delivery when needed. See page one.

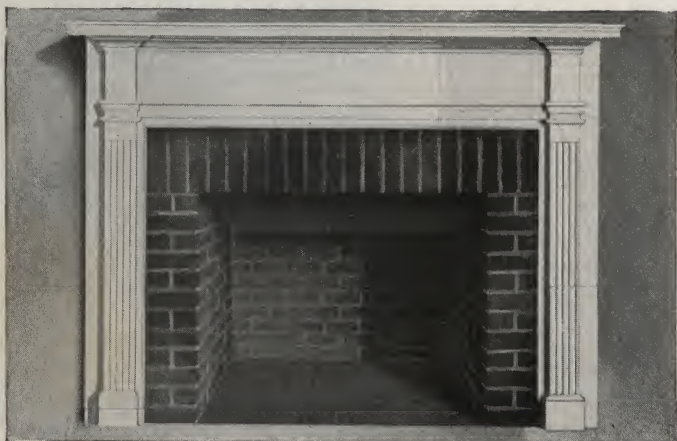

Mantels

C-6050 This small mantel, patterned after those so often found in fishermen's cottages on old Cape Cod, has the charm of simplicity. It is complete, ready to slip in place and receive the desired paint, stain or varnish.

Height to top of shelf.....	4' 0 $\frac{1}{4}$ "	Width of wood opening.....	3' 3 "

Length of returned ends..... 1' 6"

Unselected Birch... \$17.20

Approximate weight, 47 lbs.

Order now to make sure of delivery when needed. See page one.

Cornice Moldings

One of the finishing touches of the "well tailored" house is a cornice molding, defining the proportions of the room. When painted or finished the same as the other woodwork of the room, such moldings offer a very pleasing color contrast in walls and ceiling.

C-6100 This design illustrated at the top may be used either with or without the panel mold C-5931 on the ceiling. Projection, $2\frac{1}{2}"$. Drop (including picture mold), $3\frac{5}{8}"$; drop (without picture mold) $1\frac{7}{8}"$. The individual members are priced for convenience. If ordered as C-6100, all members will be shipped.

		White Pine	Plain Oak
C-5931	Panel Mold..... $\frac{1}{2}" \times 1\frac{3}{4}"$ per 100 lin. ft.....	\$2.81	\$4.30
C-5978	Ceiling Mold..... $\frac{3}{4}" \times 2\frac{1}{2}"$ per 100 lin. ft.....	4.11	6.11
C-5367	Bed Mold..... $\frac{1}{2}" \times 1\frac{1}{8}"$ per 100 lin. ft.....	1.80	2.69
C-5975	Picture Mold..... $\frac{3}{4}" \times 1\frac{3}{4}"$ per 100 lin. ft.....	2.81	4.30

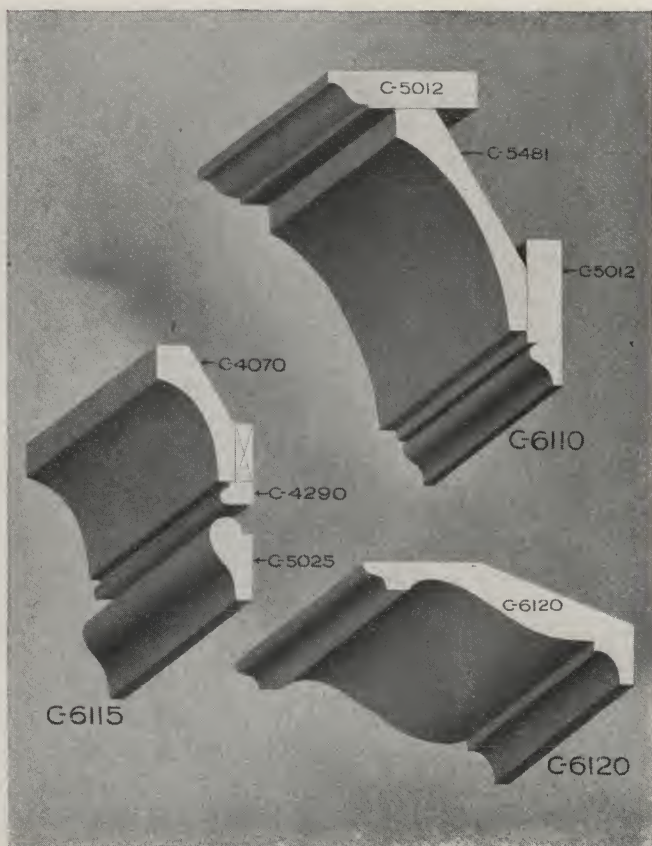

C-6105 A two-member cornice molding has a projection of 3" and a drop (including picture mold) of 5". The drop without picture mold is $3\frac{1}{4}"$.

		White Pine	Plain Oak
C-5979	Cornice Mold..... $\frac{3}{4}" \times 4\frac{1}{2}"$ per 100 lin. ft.....	\$7.47	\$12.57
C-5975	Picture Mold..... $\frac{3}{4}" \times 1\frac{3}{4}"$ per 100 lin. ft.....	2.81	4.30

Order now to make sure of delivery when needed. See page one.

Cornice Moldings

There is an architectural reason for the use of cornice, in that these heavy moldings have the desirable effect of supporting the ceiling. The bevel backs of Curtis cornices decrease contact with the plaster and insure a perfect fit against the corner.

C-6110 Projection $3\frac{3}{4}"$; drop, $5\frac{3}{8}"$. In ordering, if C-6110 is specified all members will be shipped.

		White Pine	Plain Oak
C-5012	Ceiling and Bed Mold $\frac{5}{8}" \times 2\frac{1}{2}"$ per 100 lin. ft.....	\$4.20	\$ 6.10
C-5481	Cornice Mold..... $\frac{3}{4}" \times 4\frac{1}{8}"$ per 100 lin. ft.....	7.47	12.57

C-6115 Projection, $1\frac{5}{8}"$; drop (including picture mold), $4\frac{3}{8}"$; drop (without picture mold), $2\frac{1}{16}"$. If C-6115 is specified all members will be shipped.

		White Pine	Plain Oak
C-4070	Cornice Mold..... $\frac{3}{4}" \times 2\frac{3}{4}"$ per 100 lin. ft.....	\$3.44	\$ 7.60

Panel Work

C-6150 Height of paneling from finished floor to top of cap, 2'7".

	<i>Plain Oak</i>	<i>Unsel. Birch</i>
Flush molded, flat panels, per sq. ft.....	\$2.00	\$2.00
Ovolo molded, flat panels, per sq. ft.....	1.42	1.42

Prices do not include base or other regular room trim.

C-6155 Paneling extends from floor to ceiling. Finished at ceiling with angle cornice

	<i>Plain Oak</i>	<i>Unsel. Birch</i>
Flush molded, flat panels, per sq. ft.....	\$2.00	\$2.00
Ovolo molded, flat panels, per sq. ft.....	1.42	1.42

Prices do not include base or other regular room trim.

In ordering, the following information will be required: Overall dimensions of room, indicating these dimensions as from each wall to center of openings; ceiling height (in C-6155); size of all door and window openings; distance from finished floor to top of sill in window frames; design of window and door trim.

Note—A minimum charge for twenty square feet of paneling will be applied. To avoid delay, measurements must be given promptly for even though the parts are stock, considerable time is required to assemble properly.

Inter-Room Openings

Inter-room openings permit longer vistas within the small house. If other beautiful features, such as stairways, fireplace, china cabinet, are carefully located, there will be an interesting view from either side of this opening. The bookcases are a very practical adjunct, especially desirable for the home which has no other suitable space for built-in book shelves. Base, jambs and trim must be ordered separately to match the room trim.

C-6300 Complete opening includes two pedestals, each with three adjustable shelves and two columns as illustrated. Pedestals 3' 4" wide, 4' 9" high, and 11" deep. Inside depth 9". Rough opening recommended: 7' 2" high from finished floor; 12' 0" wide, forming passageway approximately 4' 6" wide. Columns are 8" square straight shaft and are furnished 2' 3" high.

Yellow Pine \$85.82
Plain Oak 98.60

Approximate weights: Yellow Pine, 330 lbs.; Oak, 350 lbs.

This inter-room opening is similar in design to the one above but is adaptable to a smaller space. Tapered columns may be substituted for the square straight shaft columns shown, if desired. Base, trim and jambs are not included in the opening and must be ordered separately to match the room trim.

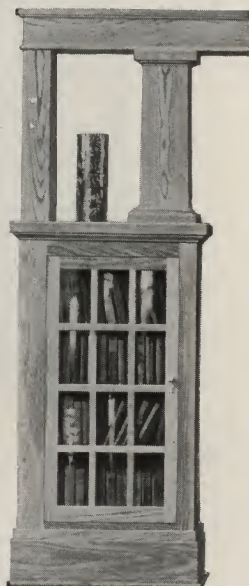

C-6302 Complete opening includes two pedestals each with three adjustable shelves and two columns as illustrated. Pedestals 2' 4" wide, 4' 9" high and 11" deep. Inside depth 9". Rough opening recommended: 7' 2" high from finished floor, 10' 6" wide, forming a passageway approximately 5' 4" wide. Columns are 8" square straight shaft 2' 3" high.

Yellow Pine ★\$69.20
Plain Oak ★ 79.46

This opening can be supplied with desk on either side (like that shown in design C-6303). For one desk pedestal, add \$16.26 for Y.P. or \$18.24 for Oak.

Be sure to specify whether desk is on right or left when facing it.

Approximate weights: Yellow Pine, 225 lbs.; Oak, 295 lbs.

No hardware is included in above prices

Order now to make sure of delivery when needed. See page one.

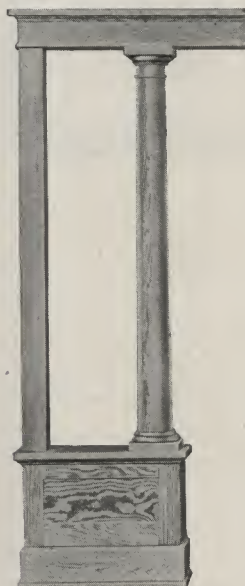

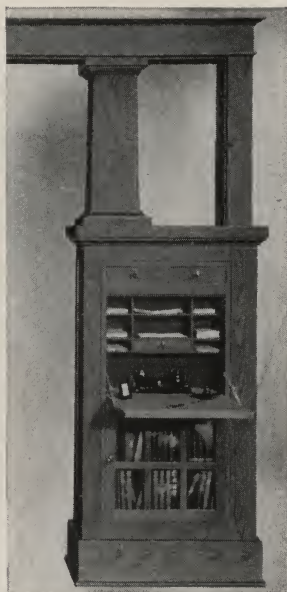

Inter-Room Openings

The neat little writing desk is a convenient feature of this design which you may have in one pedestal instead of the second bookcase. The columns pictured here are interchangeable with a straight square shaft column as shown in the C-6302. Base, trim and jambs are not included in the opening and must be ordered separately to match the room. The backs of these "colonnades" show two vertical flat panels.

C-6303 Complete opening includes one pedestal from C-6302 with column from C-6303 and one pedestal and column as illustrated at the right. All dimensions are the same as listed under C-6302. *Be sure to specify whether desk is on right or left when facing it.*

Yellow Pine.....\$85.46
Plain Oak.....97.70

Approximate weights: Yellow Pine, 275 lbs.; Oak, 308 lbs.

Small rooms may be made to appear more spacious by having large openings between them. "Colonnades" such as those on this page are especially effective in this regard. The base and trim should be ordered to match the balance of the room trim.

C-6325 Complete opening includes two pedestals and two columns as illustrated. Jambs, trim and base are not included. The round columns are 6" x 6" x 6' 0" slightly tapered. Pedestals are 2' 4" wide; 2' 0" high; and 10" deep. Maximum rough opening 8' 2" from finished floor, 10' 6" wide, forming a passageway approximately 5' 4" wide.

Yellow Pine.....\$29.30
Plain Oak.....46.24

Approximate weights: Yellow Pine, 133 lbs.; Oak, 140 lbs.

C-6326 Complete opening includes two pedestals and two columns that are square tapered 6" to 5", 6' 0" high instead of round. Otherwise it is the same as C-6325.

Yellow Pine.....\$33.22
Plain Oak.....53.11

No hardware is included in above prices.

Order now to make sure of delivery when needed. See page one.

Hanging China Closets

C-6400

An interesting design. This cabinet is intended for hanging flat against the wall.

Overall dimensions of C-6400 are: width 3' 2", height 3' 2 $\frac{3}{4}$ ", depth 8 $\frac{1}{2}$ ". Inside depth 7". Adjustable shelves $\frac{3}{4}$ " x 2' 4" x 1' 2". All face stock 1 $\frac{1}{8}$ " thick.

White Pine, Glazed D. S. \$22.16

Approximate weight, 75 lbs.

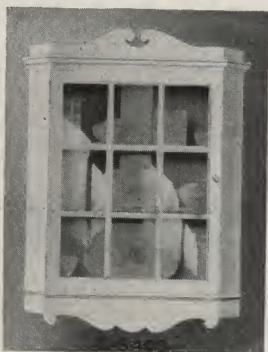

C-6405

This cabinet is to hang in corner.

Overall dimensions are: 2' 6 $\frac{3}{4}$ " wide, 3' 5 $\frac{1}{8}$ " high, 1' 4 $\frac{1}{2}$ " deep. Inside depth, 1' 2 $\frac{1}{8}$ ". Adjustable shelves $\frac{3}{4}$ " x 2' 4" x 1' 2" in greatest dimensions. All face stock 1 $\frac{1}{8}$ " thick.

White Pine, Glazed D. S. \$26.72

Approximate weight, 70 lbs.

C-6410

This cabinet is to hang in corner.

Overall dimensions are: 2' 6 $\frac{3}{4}$ " wide, 2' 11 $\frac{1}{8}$ " high, 1' 4 $\frac{1}{2}$ " deep. Inside depth 1' 2 $\frac{1}{8}$ ". Adjustable shelves $\frac{3}{4}$ " x 2' 4" x 1' 2" (greatest dimensions). All face stock 1 $\frac{1}{8}$ " thick.

White Pine ("open face"—no sash) . . . \$19.23

Approximate weight, 56 lbs.

No hardware is included in above prices.

Corner China Closets

Among the enticing features of the old Colonial house are its corner cupboards. The modern Curtis china closets are quaint and charming. This one is an exact reproduction of a cabinet used at the time of the Revolutionary War. The fluted pilasters, raised panels and delicate moldings are strictly in accord with the best traditions.

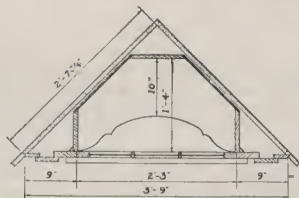

C-6500 Includes trim as illustrated. Overall size 3' 9" wide, 8' 1" high, 1' 6" deep. Height of rough opening required 7' 6". Inside depth 1' 4". Counter line 2' 4" high. There are three adjustable shelves and one below counter line. Size (inside) of compartment behind the two paneled doors below the counter line is 2' 2½" wide, 1' 10¾" high and 1' 4" deep. Front edges of shelves above the counter line are molded and curved. Minimum depth of shelves 10". See section below for outline. Face stock 1½" thick.

White Pine.....★\$64.90
Unselected Birch.....★ 72.15

Extra Shelves, each—

White Pine..... 1.54
Unselected Birch..... 2.10

Approximate weights: White Pine, 250 lbs.; Birch, 280 lbs.

Installation Detail

C-6501 Is the same size as C-6500 above and is exactly similar in design except that the glazed top door is omitted, leaving the upper portion open. The installation detail above shows just how this case is fitted into the corner. It may be installed in an old house as well as a new one.

White Pine.....★\$46.58
Unselected Birch.....★ 55.50

Extra Shelves, each—

White Pine..... 1.54
Unselected Birch..... 2.10

Approximate weights: White Pine, 225 lbs.; Birch, 250 lbs.

NOTE

These cases are complete ready to slip in place and receive the hardware and the finish.

No hardware is included in above prices.

Corner China Closets

Corner cupboards are space saving and convenient and may be used in even the smallest house, old or new. They are attractive and appropriate either singly or in pairs.

C-6510 Is furnished including trim as illustrated. Overall size 3' 1" wide, 7' 0 1/4" high, 1' 2 3/4" deep. Inside depth 1' 0 3/8". Height of rough opening required 6' 10". Counter line 2' 4" high. There are four adjustable shelves above and one below the counter line. Size (inside) compartment below counter line is 2' 4" wide, 1' 10 1/4" high and 1' 0 3/8" deep. Greatest dimensions of molded shelves are 2' 3 5/8" x 1' 0 3/8". Face stock 1 1/8".

White Pine, Set up..... ★\$40.00

Approximate weight, 160 lbs.

Installation Detail

No rough plaster opening is required at the sides of these closets. The detail above shows the method of installation.

These cupboards may occupy a space which would otherwise be wasted. They are as skillfully designed as any movable furniture, duplicating in every important detail the most interesting items of earlier days. The shape of the inside of these cabinets make for easy cleaning, which all housekeepers will appreciate.

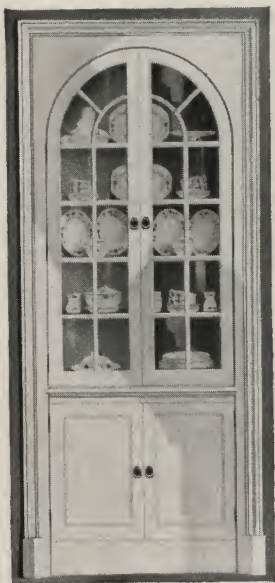

C-6511 Similar in size and general design to C-6510 above but with the addition of two circle top glazed doors. It includes the trim as illustrated.

White Pine, Glazed D. S..... ★\$54.78

Approximate weight, 180 lbs.

NOTE

These cases are complete ready to slip in place except that no hardware is included and the trim must be applied to joint with the wall. They are not painted.

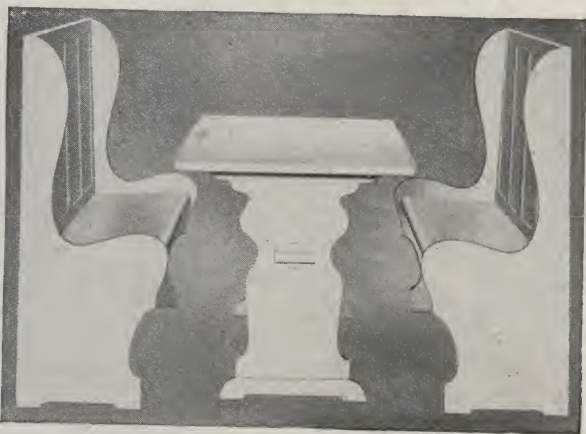

No hardware is included in above prices.

K. D. Kitchen Dresser

C-6750 For houses in which the strictest economy is absolutely necessary, the Curtis kitchen dresser pictured here is available. It is made in White Pine, of $\frac{3}{4}$ " material, throughout including doors and counter shelf and is furnished without back. This design comes knocked down, to be assembled on the job. Instead of dovetailed flush drawers, it has drawers with butt joints and lipped fronts. The cabinet is ceiling height and does not have a separate ceiling compartment. The front face of the case is put together at the factory with mortised and tenoned joints. All doors are paneled; counter shelf glued up and nosed; the drawers have lip fronts. Four shelves are furnished for the top compartment; one for the bottom. Necessary shelf cleats are included. There is no vertical division in the bottom compartment.

Overall size of case 4' 0" wide, 8' 6" high, 1' 0 $\frac{1}{2}$ " deep above, and 1' 4 $\frac{1}{2}$ " deep below counter shelf. Inside depth 11 $\frac{3}{4}$ " above and 1' 3 $\frac{3}{4}$ " below. Height to top of counter shelf 2' 10". Height open space above counter shelf 1' 6 $\frac{1}{4}$ ". Distance between shelves if all are equally spaced, 10 $\frac{1}{2}$ ". Inside size compartment below 3' 10 $\frac{1}{2}$ " wide, 2' 2" high, 1' 3 $\frac{3}{4}$ " deep. Doors are 1' 7" x 3' 7 $\frac{3}{4}$ " and 1' 7" x 2' 1 $\frac{1}{4}$ ", both $\frac{3}{4}$ " thick. Inside dimension drawers 1' 5 $\frac{3}{4}$ " x 1' 2 $\frac{3}{4}$ " x 4 $\frac{3}{8}$ ". (Wt. 175 lbs.).

Broom Closets

C-6760

C-6762

A conveniently located cabinet for brooms, mops and brushes, with shelves for other cleaning helps, is a modern necessity. The design at the left above is to be fitted in a corner of a room or at either side of any 7-foot kitchen dresser becoming an integral part of it. It is furnished without a back. The design at the right, is to be built into the wall between studs.

C-6760 Material shipped K. D. (to be assembled). Overall size 1' 6" wide, 7' 0 1/2" high and 1' 5 3/4" deep. Inside dimension 1' 5 3/4" wide, 6' 11 3/4" high and 1' 4 3/8" deep. Face stock 1 1/8" thick. Door 1' 2" x 6' 8" x 1 1/8". (Wt. 48 lbs.)

White Pine..... ★\$14.72

C-6762 Without trim. Will accommodate trim either 3/8" or 3/4" thick. Rough opening 1' 2 3/8" wide, 6' 9 1/2" high, 4 3/8" deep. Inside dimension 1'-0 3/8" x 6'-8 1/4" x 3 3/8". Shelf material 3/4" thick. Door 1' 0 3/8" x 6' 8" x 1 1/8". Wallboard back. Ready to set in wall. (Wt. 35 lbs.)

Ironing Boards

C-6770

C-6772

A built-in ironing board is a labor saver that every housekeeper appreciates. The boards illustrated here do not require awkward, heavy lifting. They are perfectly rigid and yet the bracing does not interfere with slipping a garment over the board. Either of these boards may be readily installed in a house already built.

C-6770 Furnished complete as illustrated. Case of White Pine. Board of White Pine. Hardware furnished except that required for hanging of door. Rough opening required 1' 7 $\frac{1}{4}$ " wide, 5' 2 $\frac{1}{2}$ " high and 4 $\frac{1}{2}$ " deep; when cut 2' 4" from finished floor makes height of board at lowest adjustment 2' 9". Board has four adjustments up to 3' 0". Overall size including trim as illustrated 1' 11 $\frac{3}{4}$ " wide, 5' 7 $\frac{1}{8}$ " high and 4 $\frac{3}{4}$ " deep. The board itself is 1' 2 $\frac{3}{4}$ " x 4' 6" x 1 $\frac{1}{8}$ ". (Wt. 50 lbs.)

White Pine..... ★\$11.11

C-6772 Furnished complete as illustrated but without trim. Trim should not be less than $\frac{5}{8}$ " thick. Hardware for doors is not furnished. Rough opening is 1' 2 $\frac{3}{4}$ " wide, 6' 9 $\frac{1}{2}$ " high and 4 $\frac{3}{4}$ " deep. Designed to line with 6' 8" door. The distance from finished floor to top of board is 2' 9". Board of White Pine is 11 $\frac{1}{2}$ " x 4' x 0" x 1 $\frac{1}{8}$ " and is not adjustable in height (Wt. 40 lbs.)

Dressing Tables

C-6801 Stool as illustrated above is made in Birch. Overall size 1' 10" long, 1' 0" wide and 1' 5½" high. (Wt. 18 lbs.)
Unselected Birch..... \$15.64

C-6810 Dressing Table (center section of illustration above). The closet and tray case shown on either side, are not included but illustrate a possible combination. Includes plain plate mirrors, paneling, three drawers and two adjustable shelves in the compartments below. The two side mirrors swing. Rough opening required 4' 5½" wide, 6' 10½" high and 1' 8½" deep. No trim is furnished. Larger mirror 3' 7½" x 2' 8". Both side mirrors 1' 2½" x 2' 2". Inside size of compartment below 11" wide, 1' 9½" high, 1' 6¼" deep. Inside dimension center drawer 1' 10¾" wide, 1' 5½" deep and 3¾" high. Smaller drawers 9¾" wide. (Wt. 350 lbs.)

White Pine, Open..... \$ 72.88
Glazed, Plain Plate Mirrors..... 100.42

C-6811 Illustrated at the right is identical with C-6810 except its width. Rough opening required 2' 11½" wide, 6' 10½" high, 1' 8½" deep. Main mirror 2' 1" x 2' 8". (Wt. 205 lbs.)

White Pine, Open..... \$50.38
Glazed, Plain Plate Mirrors..... 72.10

Dressing tables may be used as single units if desired but their utility is greatly increased by combining them with the tray cases as illustrated above.

No hardware is included in above prices.

Order now to make sure of delivery when needed. See page one.

Linen and Tray Cases

In the bedroom, a tray case takes the place of a chest of drawers. Trays of various sizes with half-enclosed ends enable one to see at a glance just where the wanted garment is. They combine with Curtis dressing tables to excellent advantage.

C-6812 Includes six sliding trays as illustrated, in well constructed case making a complete unit. Platform nosing is furnished but no other trim. All walls of opening should be plastered. Plaster opening required is 2' 7½" wide, 6' 9¼" high, 2' 4" or more deep. Distance from top of case to under side of head jamb is 2' 8". Case to be set 2" from finished floor. Inside dimension of trays 2' 1" wide, 1' 10½" deep graduated from 8¼" high at the bottom to 4¼" high at the top. Case fits behind a 2' 6" x 6' 6" door to line with 6' 8" room doors. To be finished with room trim. (Wt. 145 lbs.)

White Pine..... \$35.35

For bedding and other household linens, the Curtis linen case at the left is substantially built, conveniently arranged and attractive in appearance. The four sliding trays and two deep drawers provide ample space for sheets and towels.

C-6813 Includes two drawers and four sliding trays and built-up case material, also two stationary shelves. Platform nosing furnished but no other trim. All walls of opening should be plastered. Plaster opening required is 2' 5½" wide, 6' 9¼" high and 2' 4" or more deep. Distance from top of case to under side of head jambs is 2' 8". Inside dimensions of drawers 1' 11" wide, 1' 10¼" deep, 6¾" high. Trays inside are 1' 11" wide, 1' 11" deep, and graduated from 6¼" high at the bottom to 4¾" high at the top. Case fits behind a 2' 4" x 6' 6" door to line with 6' 8" room doors. (Wt. 165 lbs.)

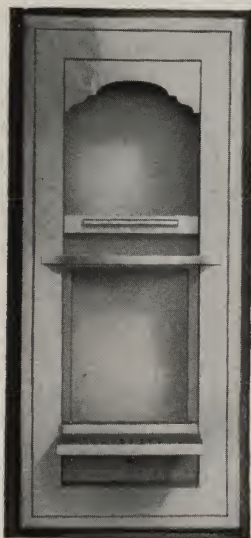

White Pine..... \$34.65

No hardware is included in above prices.

Order now to make sure of delivery when needed. See page one.

Telephone Cabinets

A telephone cabinet is a new and practical convenience. Besides the telephone shelf, the design at the left below has a place for the directory and the bell box. The door of this cabinet forms a strong seat. Both shelf and seat are of the correct height for comfortable use.

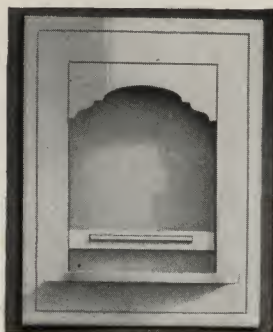

C-6910 Rough opening required 1' 2 $\frac{3}{8}$ " wide, 3' 3" high and 4 $\frac{3}{8}$ " deep. When rough opening is cut 1' 5" from finished floor, the door-seat will be 1' 10 $\frac{3}{4}$ " high and the phone shelf 3' 3" from the floor. Approximate weight 26 lbs.

White Pine \$14.50

C-6911 Telephone cabinet is similar in design to the top part of C-6910. It does not have the space below the shelf for the telephone bell box. Rough opening required is 1' 2 $\frac{3}{8}$ " wide, 1' 6 $\frac{1}{4}$ " high and 4 $\frac{1}{4}$ " deep. When rough opening is cut 3' 3" above finished floor the telephone mouthpiece will be about 4' 2" high. Approximate weight, 16 lbs.

White Pine \$6.96

Order now to make sure of delivery when needed. See page one.

Medicine Cabinets

Curtis medicine cabinets have two adjustable shelves and C-6916 has a handy open shelf below in addition. The good mirrors are a useful feature. Medicine cabinet C-6918 is not illustrated but is similar in appearance to C-6917. It costs less because it is smaller and has a wall board back instead of three-ply wood panel back.

C-6916 Rough opening required 1' 9 1/2" wide, 2' 6 1/4" high, 4 1/2" deep. Inside depth 4 1/8", mirror 16" x 20" plain plate. Size of compartment below 1' 7 3/8" wide, 4 1/4" high, 5 1/8" deep. Door 1 3/8" thick. (Wt. open, 29 lbs.; glazed, 35 lbs.)

White Pine, Open..... ★\$5.74

Stair Newels

These starting and angle newels are grouped in the order in which they are used. C-9000 and C-9001; C-9010 and C-9011—C-9020 or C-9022 or C-9024 and C-9025 are combinations that should form parts of the same stair. They are so designed and proportioned. The angle newel should be of the same design but subordinate to the starting newel. No end grain appears at the corners of these newels. Lock mitre joint construction is employed wherever possible in the manufacture of these newels.
